DETAILED ACTION

Allowable Subject Matter

Claims 1-7 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art of record does not disclose or teach a linear actuator having a rear end cap, a yoke support member and a front end protrusion all formed of resin injected simultaneously in combination with the other features of claims 1 and 7. Japanese reference 08-308205 A cited by applicant and also cited in a European PCT search report discloses in paragraph 0028 of the machine translation a housing 1 formed by injection molding. Housing 1 could be viewed as providing an end cap and yoke support member. Housing element 10 could be viewed as the front end protrusion. There is no indication in the reference that housing 1 and housing 10 are integrally formed of resin injected simultaneously. In regard to method claim 7, the structural elements that made claim 1 allowable are present in this claim. Therefore claim 7 is also allowable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Judson H. Jones whose telephone number is 571-272-2025. The examiner can normally be reached on 8-4:30 M-F.
